# TABLE OF CONTENTS

| | | PAGE |
|---|---|---|
| HENRY CHANDLER COWLES, frontispiece | | 1 |
| Postglacial migration of forests in Illinois, Wisconsin, and Minnesota (with fifteen figures) | *John Voss* | 3 |
| Anatomy of the vegetative organs of the parsnip (with forty-four figures) | *Winifred Caroline Warning* | 44 |
| Leader, needle, cambial, and root growth of certain conifers and their interrelations (with five figures) | *Raymond Kienholz* | 73 |
| Embryogeny of *Carya* and *Juglans*, a comparative study (with plate I and fifty-six figures) | *LaDema M. Langdon* | 93 |
| Influence of temperature and nutrition on the growth and duration of life of *Cucumis melo* seedlings (with five figures) | *Thomas I. Edwards, Raymond Pearl, and Sophia A. Gould* | 118 |
| Some new or otherwise noteworthy members of the Labiatae and Compositae | *Earl Edward Sherff* | 136 |
| Comparative morphology of *Dumortiera hirsuta* (with thirty-five figures) | *Sister Mary Ellen O'Hanlon* | 154 |
| Influence of supplemental light on blooming (with three figures) | *Francis Ramaley* | 165 |
| Persistence of subspecific types of *Xanthium* under field conditions (with three figures) | *Charles A. Shull* | 175 |
| *Callixylon whiteanum* sp. nov., from the Woodford Chert of Oklahoma (with three figures) | *Chester A. Arnold* | 180 |
| Chemical composition of certain aquatic plants | *Horace J. Harper and Harley A. Daniel* | 186 |
| Experimental data for a revision of the North American wild roses (with twenty figures) | *Eileen Whitehead Erlanson* | 197 |
| Origin and cellular character of xylem rays in gymnosperms (with nineteen figures) | *M. W. Bannan* | 260 |

PAGE

Studies on the germination of the spores of certain Basidiomycetae (with two figures) - - - - *Fred H. O. Kaufmann* 282

A study of the vegetative phases of *Ephedra* (with twenty-five figures) - - - - - - - - - *Paul D. Voth* 298

Structural responses to the practice of topping tobacco plants: A study of cell size, cell number, leaf size, and veinage of leaves at different levels on the stalk (with four figures) - - - - - *George S. Avery, Jr.* 314

Effect of ultraviolet radiation on growth and on the calcium and phosphorus contents of plants (with plate II and one figure) - - - - - - - - *Harris M. Benedict* 330

Studies on *Petunia*. VI. The origin and distribution of color in the anther and in the pollen of *Petunia* (with plate III) - - - - - - - - *Margaret C. Ferguson and Barbara Hunt* 342

Structure of meiotic chromosomes in microsporogenesis of *Tradescantia* (with plate IV) - - - *Karl Sax and L. M. Humphrey* 353

*Schilderia adamanica:* a new fossil wood from the petrified forests of Arizona (with plate V) - - *L. H. Daugherty* 363

Anatomy of aerial roots of *Vitis rotundifolia* (with five figures) - - - - - - - - - - - - - *Lewis M. Turner* 367

Effect of after-ripening treatment on germination of white pine seeds of different ages (with one figure) - - - - - - - - - - - - - *Henry I. Baldwin* 372

Relation of root distribution to organic matter in prairie soil (with eleven figures) - - - - - *J. E. Weaver, V. H. Hougen, and M. D. Weldon* 389

Alternation of generations in *Ectocarpus siliculosus* (with plates VI and VII and thirteen figures) *George F. Papenfuss* 421

Improved methods for the purification of the common carotenoids, and the quantitative measurement of their absorption spectra (with three figures) - - - - - - - - - - - - - - *Elmer S. Miller* 447

Toxicity of phenolic compounds to certain onion bulb parasites - - - - - - - - - - - *J. C. Walker and Karl Paul Link* 468

PAGE

Genetical and cytological study of species hybrids of Asiatic and American cottons (with twenty-two figures) - - - - - - - - - - - - *C. F. Feng* 485

Comparative study of the developing and aborting fruits of *Prunus persica* (with twenty-seven figures) - - - - - - - - - - - - - - *Thomas J. Harrold* 505

Cytological effects of a gene in *Datura* which causes dyad formation in sporogenesis (with thirty figures) - - - - - - - - - - - - - *Sophia Satina and A. F. Blakeslee* 521

Cultural characters and pairing reactions of monosporous mycelia and development of the fruit body of *Pholiota* (*Flammula*) *polychroa* (with thirty figures) - - - - - - - - - - - - *Alexander H. Smith and Harold J. Brodie* .533

Salient lines of structural specialization in the wood rays of dicotyledons (with plate VIII and one figure) - - - - - - - - - - - - - - *David A. Kribs* 547

Somatic chromosome numbers in the genus *Sedum* (with fourteen figures) - - - - - - - - *J. T. Baldwin, Jr.* 558

Chromosome numbers of some of the Cactaceae (with seventeen figures) - - - - - - - - *Palmer Stockwell* 565

Maternal transmission of mutated plastids in the Japanese morning glory (with two figures) - - *Kiichi Miyake and Yoshitaka Imai* 571

Effects of temperature on growth, anatomy, and metabolism of apple and peach roots (with eleven figures) - - - - - - - - - - - - *G. T. Nightingale* 581

Morphology and biology of some species of *Odontia* (with nineteen figures) - - - - - - - - *Clair A. Brown* 640

Effects of environment upon the root habits of certain deciduous forest trees (with fourteen figures) - - - - - - - - - - - - - - *Harold H. Biswell* 676

Physiology of pines infested with bark beetles (with eleven figures) - - - - - - - - - - - - *Ralph W. Caird* 709

Macrosporogenesis and development of the macrogametophyte of *Solanum tuberosum* (with plates IX, X) - - - - - - - - - - - - - *Olive L. Rees-Leonard* 734

PAGE

The Monimiaceae and a new *Laurelia* (with two figures) - - - - - - - - - - - - - - *Edward W. Berry* 751

The light line in *Melilotus alba* (with four figures) *Douglas H. Hamly* 755

Seed and seedling of *Acorus calamus* (with three figures) - - - - - - - - - - - - - - *Murray F. Buell* 758

BRIEFER ARTICLES—

Chromosomes of the soy bean - - - - - - *Collins Veatch* 189

CURRENT LITERATURE - - - - - - - - - - 190, 377, 575, 766

## HENRY CHANDLER COWLES

It is with keen regret that the editorial board of the BOTANICAL GAZETTE finds itself faced with the resignation of Dr. HENRY CHANDLER COWLES as editor. For the past nine years the journal has been under his leadership. He will continue as an associate editor of the GAZETTE, and impart to it his critical and careful guidance as he has done during the past years. Dr. COWLES is also retiring as Chairman of the Department of Botany, and has become Professor Emeritus.
